MEDICAL CODING SPECIALIST

CERTIFICATE PROGRAM

Medical Coding Specialists organize and manage health information data by ensuring its quality, accuracy, accessibility and security in both paper and electronic systems. They utilize coding languages to categorize various diseases and treatments and may also review billing and insurance claim files and recommend them for approval or further investigation, subsequently providing information to ensure accurate insurance reimbursement.

The student will learn principles of medical coding related to the three main code books: CPT®, ICD-10-CM Code Set and HCPCS Level II. This course is recommended for anyone who is preparing for a career in medical coding for a physician's office and strongly recommended for anyone who is preparing for AAPC's CPC certification examination.

This program requires you to have a high school diploma or the equivalent prior to enrolling. Also highly recommended are basic secretarial skills, minimum typing of 35 wpm and basic computer knowledge and basic math skills.

For additional information about this program, contact Monique Brathwaite at monique.brathwaite@ucc.edu The program will begin with introducing the student to the structure and function of the human body. Medical Terminology including medical root words, prefixes, suffixes, abbreviations and definitions of all body systems will be covered.

Then you will cover the business of Medicine, review of Anatomy, overview of ICD-10-CM, applying the ICD-10-CM Guidelines, accurate ICD-10-CM Coding, introduction to CPT® HCPCS Level II, and Modifiers, Integumentary System, Musculoskeletal System, Respiratory and Cardiovascular Systems, Hemic & Lymphatic Systems, Mediastinum, Diaphragm and Digestive System, Urinary System and Male Genital System, Female Reproductive System and Maternity Care and Delivery, Endocrine and Nervous Systems, Special Senses (Ocular and Auditory), Anesthesia, Radiology, Pathology and Laboratory, Evaluation and Management services, Medicine and Final Exam. (135 hrs.)

Upon completion, students will be eligible to test for the AAPC's Certified Professional Coder (CPC) certification examination.

AEHL 136 Sec 100E - Remote Live T, Th, 9/26 - 3/21/2024 6 - 9 pm, \$2,800 (No class 11/23, 12/19, 12/21, 12/26, 12/28, 1/2/2024 and 1/4/2024)

Allied Health Course Waiver Procedures

Students may apply for a course waiver to fulfill part of the curriculum program requirements if they have taken a course or have prior work experience which led to certification or licensure by submitting documentation and evidence of certification/licensure. Students must submit the following documentation:

- An email addressed to coned@ucc.edu requesting a course waiver for a specific course.
- 2. Waiver for a didactic course: an official transcript for the considered course and a detailed course syllabus. The syllabus should include the course outline including the textbooks used and/or other learning experiences. All previous classes considered for waivers must have a minimum of "B" GPA or equivalent. PLEASE DO NOT SEND ANY OF YOUR ORIGINAL DOCUMENTS. Scan and email documents to **coned@ucc.edu**.

Uniform Construction Code

These classes are for general contractors and others who are looking to advance their careers and become New Jersey State Inspectors for local municipalities. The courses are open to anyone with an interest in construction and mandatory for those desiring licensure in building, electrical, elevator, fire protection, plumbing; and administrative licensure in sub code official, construction official, and technical assistance.

The courses focus on technical needs for contractors, estimators, architects, engineers, and government officials as they relate to the design, construction, and maintenance of building structures. Courses are approved for licensure by the New Jersey Department of Community Affairs (DCA) pursuant to NJAC 5:23-5.20 and must be taken in the proper sequence (RCS- ICS-HHS). Licensing application packets and related inquiries should be directed to the DCA Licensing Unit at 609-984-7834.

It is recommended to review this packet before undertaking a course. Through a grant funded by the Department of Community Affairs, individuals who successfully complete a course and apply for licensing may be refunded up to 100% of tuition fee. Funding is limited. Information provided in class.

Textbooks: The Uniform Construction Code Act and Regulations (Blue Book) is a required text if you are taking the administrative courses of the Uniform Construction Code Courses. Additional textbooks may be required depending upon the specific course. Call the Publications Office at 609-984-0040 or order online at www. state.nj.us/dca/divisions/codes/forms/ pubs_subs_orderform.pdf

For specific information, visit the respective college's website.

Licensing will no longer supply texts for the administrative classes (Subcode official, Construction Official and Technical Assistant).

Students can download resource materials for those classes at https:// www.nj.gov/dca/divisions/codes/ offices/ucc_college_resources.html

Participate in these courses through a combination of in-person and online sessions. See specific dates and times listed below. In-person sessions are held on the Cranford campus.

Supply Chain Management

SUPPLY CHAIN MANAGEMENT PROGRAM

This program leads to certification by the **Council of Supply Chain Management Professionals**

(CSCMP) in any or all eight (8) subjects. Each is a 40-hour course and requires study time outside the classroom for success on the exams. Courses below include the SCPro exam, student manual and online supporting study materials.

Supply Chain Management -SCPro Fundamentals CSCMP Certification

Success in the transportation, logistics and distribution (TLD) sector requires an understanding of eight different areas that impact the movement, costing, and stocking of goods. For entry level or mid-level employees in this industry, the SCPro Fundamentals of Supply Chain certification from the Council of Supply Chain Management Professionals (CSCMP) gives you the essential knowledge to succeed. Investing in yourself with this training proves to your current or future employer that you've got the essential knowledge and drive for a career in this growing sector.

We are offering training and testing this fall through online, self-paced instruction in each of these 8 essential areas. Courses require approximately 40 hours of study each. Successful participants who pass the exam will earn important industry recognized credentials in their choice from 8 areas. The fee for each course is \$260 and includes the on-campus certification exam.

Supply Chain Management Principles

Supply chain management is one of the fastest growing fields today. It is also expansive, as there are many functions and roles within it. Key elements of this course include the definition of supply chain and the various flows within supply chain (i.e., customer service, manufacturing and service operations, order management, procurement and supply management, demand planning, inventory management, warehousing operations, and transportation operations). It also includes an explanation of how the supply chain supports organizations' strategic and financial goals.

AEBU 155 Sec 003E - \$260

Customer Service Operations

Customer service agents, order management associates, and associates in other supply chain domains should understand the importance and extent of customer service and order management processes, techniques, and terminology that support order fulfillment and management. Key elements of this course include the elements of the order process, customer relationship management, management of challenging customers, effective customer communications, returns and reverse logistics, and performance metrics.

AEBU 158 Sec 003E- \$260

Transportation Operations

Transporting goods often requires multiple modes of transportation; the combination of modes can vary depending on cost, values, dimensions, weights, frequencies, time-definite delivery requirements, and other special requirements (e.g., hazardous or refrigerated cargoes). Key elements of this certification track include: modes of transportation, transportation technology, company roles and operations within the transportation field, the impact of transportation on the overall economy, sustainability in transportation, and how the field is evolving to meet future needs.

AEBU 157 Sec 003E - \$260

Warehousing Operations

Warehousing Operations encompasses the processes, procedures, tools, and equipment within a warehouse facility as enablers for an efficient, effective, and comprehensive supply chain. Warehouses do not operate as stand-alone facilities but function to varying degrees with Inventory Management, Transportation Operations, Demand Planning, Procurement, Manufacturing, and Customer Service functions. The charter, mission, and goals developed by an organization will dictate the role of the supply chain to meet those objectives. This role will further define the requirements for warehousing operations ranging from a simple, single storage facility to a total distribution or fulfillment network.

Key elements of this certification track include: an overview of warehousing, the role of warehousing in the supply chain, facility configuration, storage and handling techniques, performance metrics, customer service considerations, and safety concerns across various types of distribution facilities.

Supply Chain Management

Demand Planning

The effective anticipation, planning, and management of demand are key factors in the success of any organization. Companies are increasingly looking to provide improved customer service levels at reduced costs. It is important for supply chain professionals to understand demand planning and management. Key elements of this course include: key aspects of demand planning, interaction between demand and order management, demand planning principles, demand planning tools and techniques, communication and management of demand, and contemporary approaches to demand planning and management.

AEBU 159 Sec 003E - \$260

Inventory Management

Inventory management is critical to the overall success of the supply chain. Therefore, it is important that all supply chain professionals have at least a basic understanding of the role, cost, and benefit of inventories. Key elements of this course include: the importance and use of inventory in the supply chain, introduction to the different types of inventory, techniques for effectively managing and controlling inventory levels, the relationship between forecasting and inventory management, and financial impacts of inventory investments.

AEBU 161 Sec 003E - \$260

Manufacturing and Service Operations

Operations departments focus on the conversion of materials to products and services. A major focus of operations is to ensure lean and efficient flow. Key elements of this course include: the role of manufacturing and service operations, linking market requirements and the selection of manufacturing processes, facility location strategies, facility layouts, the importance of production planning and control in synchronizing operations, the importance of quality management and performance measurement, and the role of emerging technologies in operations.

AEBU 160 Sec 003E - \$260

Supply Management and Procurement

Procurement and purchasing associates, sourcing analysts, supplier managers, and associates in other supply chain domains should understand the importance and complexities of global supply management and procurement processes. Key elements of this course include: strategic, tactical and operational procurement; procurement organization structures; legal and regulatory considerations; the interaction of procurement organizations with the rest of the supply chain; and typical difficulties encountered in procurement processes.
