RE: UCNJ FOOD TRUCK RFP No: RFP2026-06

The following information is added to the proposal documents for the aforementioned subject.

Questions/Answers:

Question: Page 19 & Page 20 - "Electricity" & "Generator" - These requirements currently conflict. In either case, we do not advise installing a portable generator in an enclosed space due to the high risk of overheating and failure in the field. Also, manufacturers immediately void the warranty when installed in an enclosed space. Will the University consider a proper sized commercial mobile generator made for mobile use and enclosed spaces?

Answer: a commercial mobile generator made for mobile use to be submitted

Question: Page 20 - "Fire Suppression" - There is a requirement for a fire suppression system but there is no equipment listed that requires a hood or fire suppression system? Please clarify if you really want a fire suppression system and if so, how big of a hood do you want (in feet)? Is there additional cooking equipment not listed that does require a hood and fire suppression system?

Answer: No suppression system needed since there is no requirement of cooking equipment

Question: Propane Needs - How much liquid propane would you like installed on the food truck? Do you want the tanks installed undermount or do you want rear mount tanks?

Answer: NO propane tanks will be needed since there is no requirement of cooking equipment.

Please complete below. A signed copy of this clarification, SIGNED BY AN OFFICER OF THE BIDDER AUTHORIZED TO DO SO, must be included with your proposal submission.
