

# ANDROID Operating System

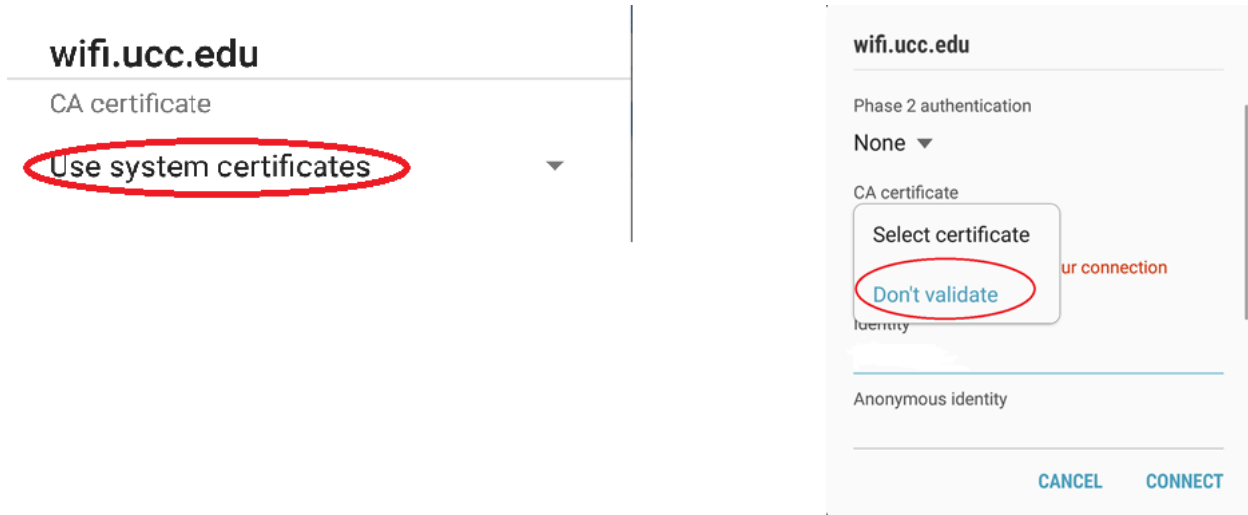

1. Please select “wifi.ucc.edu” from the list of available connections.

2. Once you select “wifi.ucc.edu” it should auto-fill the below fields and if it doesn’t, please select as per the below screenshot. If “CONNECT” is highlighted and you can click on it then, go to No.3 and if it is not highlighted then, go to No. 2.1

- 2.1. If the "CONNECT" option is greyed out then, click on the drop down option near CA certificate and depending on the OS version on your mobile device, select either "Don't Validate" or "Use system certificates"

3. If it prompts for Domain then enter "campus.ucc.edu" else just enter your UCC credentials (the same credentials you use to login to the PC) as per below and click connect.

**wifi.ucc.edu**

CA certificate

Use system certificates

---

Domain

campus.ucc.edu

Identity

utkarsh.shah

---

Anonymous identity

Leave it blank

---

Password

XXXXXXXXXX

Show password

Advanced options

**CANCEL** **CONNECT**

You should now be able to connect to the secure UCC Wi-Fi.
